"HECO" cab will be built to fit your hoistway. HECO can provide a product to accommodate most conditions.

( # ) Represents Overall Platform Dimension

The HECO logo is displayed in white, bold, sans-serif capital letters within an orange rounded rectangular box. The background of the entire advertisement is a close-up photograph of a wooden elevator door with a silver metal frame and a red number '3' on a glass panel.

# HECO

THE HOME ELEVATOR CO

**The Home Elevator Co will provide the following items with every order:**

Highest grade hydraulic and winding drum elevators for residential use.

Every elevator installed to give the maximum space allowed.

Focus on quality installation and not how fast we can leave.

We use only company employees that are committed to our success and highly trained and not subcontractors to complete work that we sell and warranty.

Competitive pricing with service agreements after installation.

2 year warranty on parts for most manufacturers we use and 1 year of labor warranty on everything we install.

Optional phone line monitoring for code required elevators within each install

HECO has over 80 years of combined experience within the elevator industry. Our highly trained technicians and management are dedicated to providing the best possible solutions for your new residential elevator installation, and most importantly, not graded on how fast they are done, but rather the quality of the install. We source every elevator to provide the most reliable service with non-proprietary components that allows you to always receive competitive pricing on future service and repairs.

**The Home Elevator Co.**
